

FERNANDO DE LA VEGA

OBJECTIVE

To obtain a challenging position where I will use the knowledge and skills that I have gained from previous work experiences, and to be given the opportunity to learn and develop new skills that will help me progress in the future.

AREAS OF EXPERIENCE:

- ReactJS/Redux
- HTML5/CSS3/Javascript
- SCSS/SASS
- NodeJS/ExpressJS
- RESTful APIs
- Database management (PostgreSQL, MassiveJS)
- Responsive web design
- GraphQL
- Cloud Providers (AWS, GCP/Firebase)
- NGINX
- Korn, Bash and Shell Scripting
- Linux/Unix Administration
- PHP
- Wordpress
- Chrome extension development
- ElasticSearch

WORK EXPERIENCE:

Wordpress Developer

01/2019 – Present Hispanic Alliance of GA Gainesville, GA

Assisting a non-profit to refactor their wordpress website.

- Implemented a system to translate the entire page from English to Spanish.
- Refactored many components already built on the website to improve efficiency and cleanliness.
- Implemented SEO techniques to improve the overall ranking of the site.

Site Reliability Engineer

01/2018 – 11/2018 Vibix LLC Alpharetta, GA

Joined startup company that helped e-commerce stores to automate their daily routine tasks. I was solely responsible to build the web presence of the company by utilizing the latest technology (ReactJS/Redux/Cloud Functions/Firebase).

Following areas were also part of my responsibilities:

- Generate/deploy/test various frontend applications for different scenarios
- Built the dashboards for quick overview infrastructure. The main focus was to monitor production application
- Installing and configuring Linux VMs via Computer Engines for quick testing and prototyping
- Work with customer issues via Hangout/Slack
- Part of a 24/7 rotational on-call team

VOLUNTEER - WEB DEVELOPER

02/2018 – 04/2018

iFunny

- Cloned and improved most features of the original website, as well as designed and implemented new ones.
- Added AWS Image uploading, which allowed the user to edit and share funny pictures.
- Added functionality that allowed the user to search for profiles, tags, as well as view popular tags and search history.

EDUCATION :

07/2017 – 10/2017

DevMountain Fullstack Development Training

- Intense 13 week coding bootcamp
- 900+ hours spent learning new technologies and developing personal projects.
- Received Javascript Web Development certification. (Available upon request.)

LANGUAGES :

Spanish – Upper-level skill in written and spoken.
